Other - Presentation
Carter Arndt from MSA presented the newest preliminary police station designs. He stated the plans were made to accommodate staff well into the future of thirty or more years, and that the entrance of the building was made to be very welcoming to the public. Materials and design were created to coordinate with the new Halfway Creek Park shelters. Carter pointed out that parking would be added during this design to not only the police facility but also north at the future library site. A walkway would be completed during this phase also to connect these areas. Trustee Kulcinski inquired as to the option of placing a basement under the police facility; due to budget constraints, a basement was not included. However, the facility is being built to easily accommodate future expansion of the office, garage and parking. Trustee Olson stated that this facility will be a wonderful upgrade from the current site; he also felt the Board made the right decision by creating a new facility rather than renovating the current library site, and he likes that the facility will have room for expansion. Carter stated that designs should be ready for a June bid process with an August construction start and a potential completion of late May to early June of 2015.

Ryan Olson/Dawn Kulcinski motioned to accept preliminary design and cost estimate on police station as presented, as well as to instruct MSA to begin the bid process. The motion carried unanimously.
